

2+ YEARS APPLIED AI	2,000+ USERS IN 2 MONTHS	AI & SOFTWARE DELIVERY	GPA 85 COMPUTER SCIENCE
------------------------	-----------------------------	---------------------------	----------------------------

PROFILE

Final-year B.Sc. Computer Science student (GPA 85) and product-oriented Applied AI & Full-Stack Developer with 2+ years of hands-on experience applying Generative AI to software products, intelligent agents and automation workflows. Founded and built BaliHofesh, reaching 2,000+ users within two months under a formal agreement with the Open University Student Union. Collaborative, ownership-driven problem solver experienced across frontend, backend, databases, APIs, validation, security and deployment.

TECHNICAL FOCUS

APPLIED AI & AUTOMATION AI agents, OpenAI API, LLM integration, prompt/context engineering, multi-stage workflows, structured JSON, automated feedback and output validation.	PROGRAMMING & FULL-STACK TypeScript, JavaScript, Python, Java, C, SQL, React, Tailwind CSS, responsive web and PWA development.
BACKEND & DATA Supabase, PostgreSQL, REST APIs, database design, authentication, authorization, RLS, storage and permissions.	AUTOMATION & OPERATIONS Edge Functions, webhooks, scheduled processes, push notifications, Git, GitHub, Linux, Vite, Vercel and Jira.

SELECTED PROJECTS

BaliHofesh - Student Platform for the Open University
Founder & Full-Stack Developer · React · TypeScript · Supabase · PostgreSQL

- Founded, architected and built an end-to-end academic platform that reached 2,000+ users within two months, supporting courses, exams, calendars, notifications, community and admin workflows.
- Delivered under a formal agreement with the Open University Student Union, translating student feedback into production features and continuous improvements.
- Engineered authentication, RLS, storage, Edge Functions, webhooks, push notifications and scheduled backend processes.

OpenAI-Powered WhatsApp Student Assistant
OpenAI API · Linux · Webhooks · Scheduled Automation

- Repurposed an older computer as a self-hosted Linux environment and deployed an OpenAI-powered agent that answers student questions and sends proactive messages.
- Automated daily summaries and connected the assistant to backend workflows through webhooks and scheduled processes.

AI-Powered Exam Evaluation & Feedback Platform
OpenAI API · Multi-stage AI workflows · Structured JSON

- Built an interactive examination system that evaluates student answers and provides structured, context-aware feedback through integrated LLM workflows.
- Designed multi-stage processes for extraction, reconstruction, solution generation and independent validation using structured JSON, rule-based checks and human review.
- Created reusable course-specific instructions and validation logic supporting multiple courses and examination formats.

Relive - Multi-Tenant Wedding Media Platform
React · TypeScript · Supabase · PostgreSQL · Vercel

- Built a multi-tenant platform with isolated event pages, guest photo/video uploads, private live galleries and adaptive customization flows.
- Owned end-to-end implementation across frontend, database, storage, permissions, privacy, admin/affiliate tools, deployment, testing, performance and production security.

EDUCATION, EXPERIENCE & LEADERSHIP

B.Sc. COMPUTER SCIENCE The Open University · GPA 85 Final Year Data Mining 100 · Computer Networks 100 · Discrete Mathematics 94 · Algorithms 89 · Systems Programming Lab 87	BANK OF ISRAEL Security Guard · 2023-Present Trusted security role at Israel's central bank while completing the degree and building production software.
